

SayIt™ Clinical Notepad

from nVoq

The Cure for Documentation Fatigue

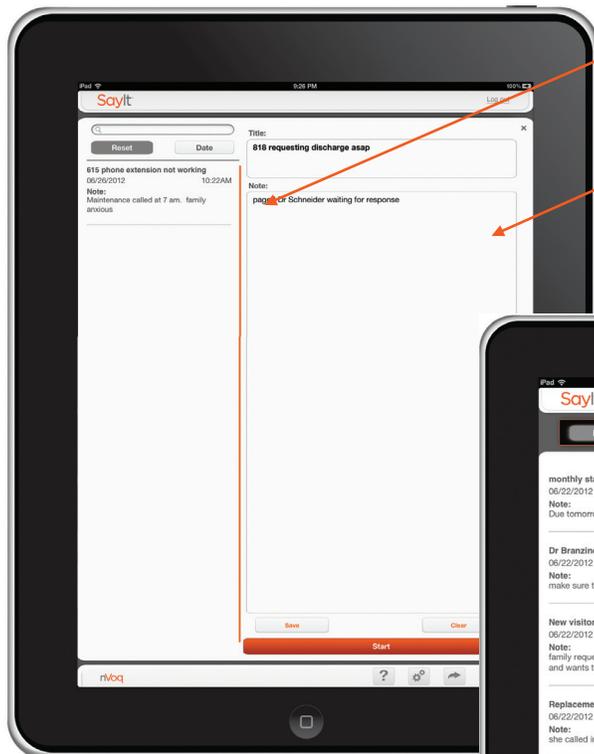

Sticky notes. Paper scraps. Back-of-hand scribbles. There's got to be a better way.

Just SayIt™ with your iPad™ – and see your notes in seconds!

SayIt is web-based speech recognition software that converts spoken words into text – on average 3 to 4 times faster than typing. Busy health care professionals are already using SayIt with a PC to dictate clinical documentation, saving time while improving accuracy.

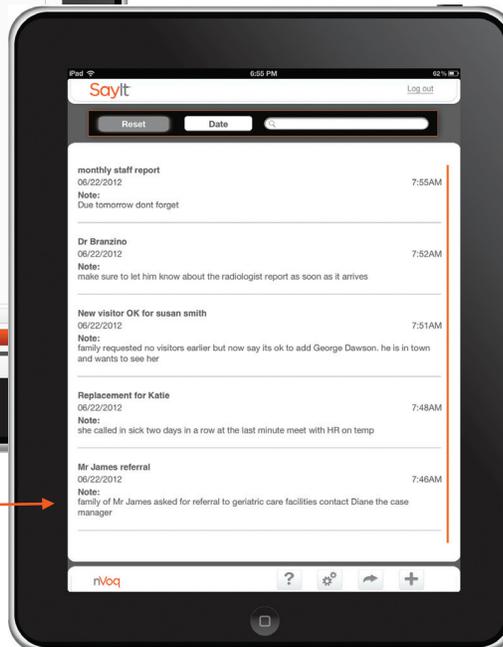

Now, the power of SayIt is extended to the iPad.

Use Clinical Notepad to record notes, lists, tasks, reminders and other important data *while on the floor*.

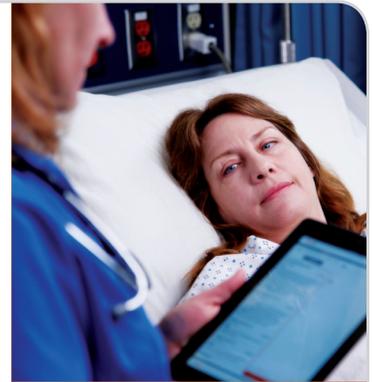

Notes are stored in order of entry throughout the shift (on left).

New notes during dictation are shown on right.

View notes in summary form.

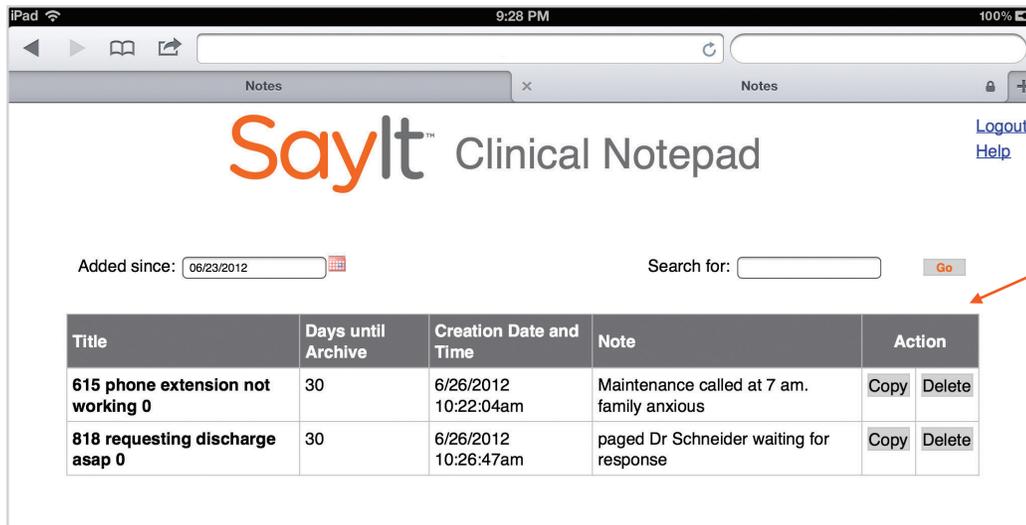

SayIt™ is exclusively endorsed by the American Hospital Association.

- Easy to use and learn
- One low-cost subscription covers all your devices
- Access anywhere there's an Internet connection
- All data captured safely in the cloud

SayIt™ Clinical Notepad

Once notes are saved in the Clinical Notepad, they're available for many different actions. Copy into reporting templates, view on-screen with colleagues, or chart into an EMR.

Added since:

Search for:

| Title | Days until Archive | Creation Date and Time | Note | Action | |
|-----------------------------------|--------------------|------------------------|--|--------|--------|
| 615 phone extension not working 0 | 30 | 6/26/2012 10:22:04am | Maintenance called at 7 am. family anxious | Copy | Delete |
| 818 requesting discharge asap 0 | 30 | 6/26/2012 10:26:47am | paged Dr Schneider waiting for response | Copy | Delete |

Access notes at any time for further action.

The SayIt Clinical Notepad. Once you've tried it, you won't want to be without it.
