AXXESS

Lighter Workdays Start Here

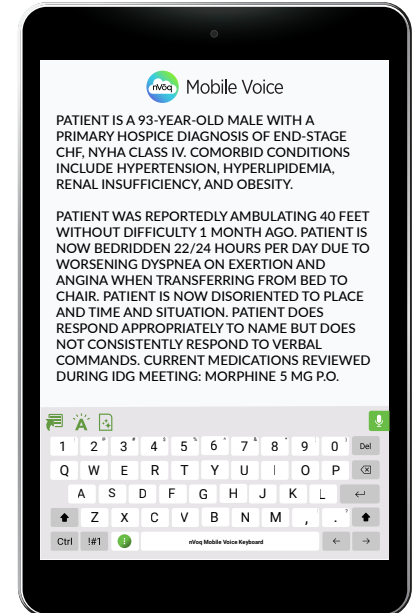

Endless documentation shouldn't define your workday. With nVoq and Axxess, your team gains a smarter way to work—using their voice to capture clear, compliant notes without the threat of looming corrections.

Faster, More Reliable Documentation Workflows

nVoq Mobile Voice is a secure voice-initiated documentation solution that enables clinicians to complete their notes faster and with greater precision.

- Secure, HIPAA-compliant voice-initiated technology
- Easily accessible with the Axxess EHR
- Flexible usage across devices: mobile, tablets, and desktop
- Developed specifically for home health and hospice, with 10 years of experience in AI-powered capabilities

How It Works

Access Your Workflow

nVoq connects directly into any EHR, allowing clinicians to dictate notes wherever they provide care.

Tell the Patient Story with Your Voice

Clinicians use nVoq's voice-enabled technology to dictate patient history, exam findings, and assessments.

Achieve Accurate and Compliant Documentation

nVoq's AI tools enhance note formatting and structure, enabling grammatical accuracy and compliance.

Works with any EHR

Completed notes flow directly into your EHR, creating a powerful transition for post-visit workflows like quality review, billing, and reimbursement.

Agencies Can Now Expect an Effortless Clinical Workflow Experience

Improved documentation accuracy and compliance

Enhanced clinician productivity and reduced burnout

Faster reimbursement and reduced denial rates

Unified integration with existing systems

Cost savings and operational efficiency

The results speak for themselves

- **Financial Impact:** Improved reimbursement compliance to 97% (Amedisys)
- **Time Savings:** Clinicians reduce documentation time by up to 50% (Eden Health)
- **Improved Accuracy:** Narrative notes are more comprehensive and 42% longer (Amedisys)
